**BACKS OUT UNDER POWER**

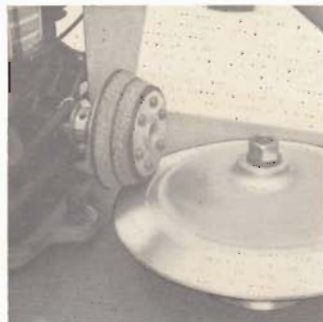

**TANDEM "SAFETY WHEELS"**

PERMITS CUTTING "CROSS-SLOPE" AND TERRACING

# ROOT Riding Mower

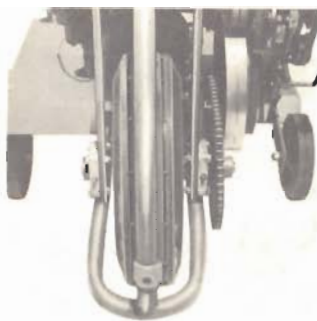

These mechanical features make the RANGERIDER a better buy and a better mower. It's a sturdy, safe and compact mowing machine built to handle big jobs fast — and it's built to last for years.

Friction drive, cone type blade clutch, disengages or engages cutting blades as desired.

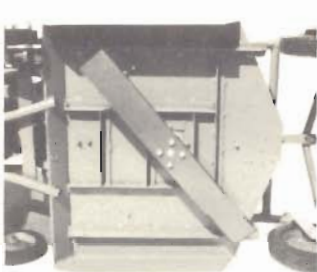

Bicycle type steering with convenient handle mounted throttle control. Front wheels ball bearing mounted. King pins have oilite bronze bushings with ball thrust bearings.

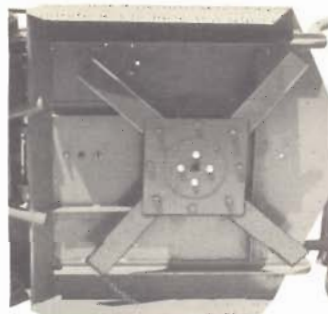

Shows final chain drive to puncture proof 16.00 x 4.00 drive tire and wheel. Also, shows tandem safety wheels.

Shows long wearing shock absorbing Round belt drive and Gear shift lever for Forward-Neutral-Reverse. Forward & Reverse at finger tip.

Shows 24" Bar Blade — suction type — of heat treated spring steel — holds sharp edge.

Also available, safety hinged 4 swing-blades assembly for extremely rough mowing.

Note "bridge" type tubular steel chassis. Low center of gravity. Seat is Seafoam rubber covered with water repellent ducking. Operator can see where he is mowing. Nothing to push — nothing to drag, completely enclosed, mowing unit is mounted in center of machine.

**POWER:** The Rangerider Rotary Riding Mower is powered with a dependable 2½ h. p. 4-cycle gasoline engine. Powerful enough to carry the heaviest adult and maintain a fast mowing speed. It can be used to pull many lawn-care attachments, from convenient hitch at back of frame.

Opens up new markets for a big mower at a reasonable price.
